

# Our People Set Us Apart

## Collective experience that features over \$4 billion of diverse projects

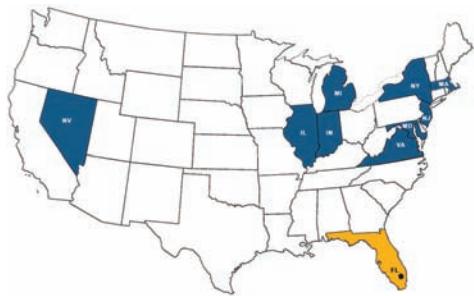

The principals, executives and staff at Modern Building Group have over 150 years of combined experience and have collectively completed over \$4 billion of construction. Our projects, which include both new construction and renovations, range in size from as small as \$100,000 to as large as \$500 million on a single assignment.

Having built projects in nearly every market segment, our professionals apply “lessons learned” techniques from past assignments to ensure timely, cost effective and quality completions. Our methodical and organized approach to the construction process is client-centered and focused on providing value added solutions to project challenges from the onset of design to ensure a complete program is delivered.
